

16 March 2020

## Coronavirus (COVID-19) pandemic Health advice from the Federal and State Governments

### SUMMARY

It is essential for Members to keep up to date with health advice from the Federal and State Governments during the Coronavirus (COVID-19) pandemic. The Governments' advice is being regularly updated and Members should review it often.

Also, the Australian Government and State Government have distributed a lot of materials to assist businesses to educate their employees about COVID-19 and the steps that everyone should take to reduce the risk of the virus spreading.

### Government advice on COVID-19

Government health departments have released a significant amount of information about Coronavirus (COVID-19) including symptoms, how the virus is spread, how the disease may be prevented and details on the public health responses.

On 15 March, the Australian Government placed full-page Notices in newspapers providing important information about COVID-19. A copy of the information in the Notice is set out in **Attachment A**.

Government advice about the virus can be accessed through the following online resources:

#### Australian Government

AUSTRALIAN GOVERNMENT ANNOUNCEMENT – 15 MARCH 2020

IMPORTANT INFORMATION ABOUT CORONAVIRUS

As you will no doubt be aware, COVID-19 (also known as coronavirus) has affected many around the world, including Australians both at home and overseas. COVID-19 is a new viral infection that can give people flu or cold-like symptoms, including sore throat, fever, cough, and shortness of breath. It can however have serious consequences for a percentage of cases, particularly the elderly and vulnerable.

Although you may have heard a lot about this new virus in the news or online, it is important to keep up-to-date with information and advice provided by official Government sources including by visiting [health.gov.au](http://health.gov.au), following the Australian Department of Health on social media, and via credible news sources.

The Australian Government has increased screening measures for international arrivals and banned non-Australian citizens arriving from highly infected countries. We strongly recommend you consider your need to travel overseas and check [smartraveller.gov.au](http://smartraveller.gov.au) for the latest advice.

You can prevent the spread of COVID-19 and other respiratory infections by making sure you:

- **Wash** your hands frequently with soap and water
- **Cover** your cough/sneeze and dispose of tissues
- **Avoid** contact with others if you're feeling unwell

At this stage you should **only** be tested for COVID-19 if you are experiencing flu or cold-like symptoms **and** have recently returned from overseas, **or** have been in direct contact with someone who is known to have contracted coronavirus. Additional testing may also be appropriate for healthcare workers.

If you start to develop symptoms, there are four ways you can receive medical assistance:

- Your local GP (be sure to phone ahead)
- Your local Emergency Department
- Specific respiratory clinics currently being established around the country
- Via Telehealth such as using your phone, Skype, or FaceTime

If you're unsure about what to do, call the Coronavirus Information Line on **1800 020 080**.

Australia has one of the best health systems in the world with some of the most dedicated and experienced health professionals. Containing the spread of an infection like COVID-19 comes down to every Australian playing their part by looking after their own hygiene, looking out for each other, and staying informed.

Hon Scott Morrison  
Prime Minister

Hon Greg Hunt  
Health Minister

Professor Brendan Murphy  
Chief Medical Officer
